

VICE PRESIDENT-OPERATIONS

Patton Group is one of the leading suppliers to the refrigeration and air-conditioning industry and is well known for quality products, premium components and excellent technical support. The group is a significant player in the New Zealand and Australian market and has a rapidly growing export market. Recently we have finalised ambitious five year business plan for the INDIAN market, for both manufacturing and trading.

We are looking for a performance driven Engineering Graduate with MBA (Marketing/Finance/Operations) from a reputable institute to set up an assembly/manufacturing plant for capital items in the Pune/Navi Mumbai area.

He will report to the Managing Director based in Noida with a clear mandate to provide dynamic leadership, coaching, mentoring and innovation to the regional team.

Apart from his initiative for setting up the plant his responsibilities include:

- Developing market and national sales for capital equipment through consultants, OEM's & contractors.
- Managing import logistics, warehouse operations and sales logistics.
- Supplying customers from western and southern regions from the warehouse attached to the plant.

This position will appeal to the candidate with knowledge and experience in the HVAC&R industry and the manufacturing of capital goods or similar.

This is suitable for someone with production/manufacturing management experience with some exposure to sales, who is people and relationship focussed and have a proven track record of success at this level.

Applications, together with a detailed curriculum vitae, and telephone contact should be forwarded to "Managing Director", C/-Patton Refrigeration India, E-57, 2nd Floor, Sector – 3 Noida, 201301 or email vinod@pattonrefrigeration.co.in in by no later than mid July.
